

Software Developer

Developer with 6+ years of experience building and improvising financial and insurance applications based out of Spring and Spring Boot.

Career Experience

JPMorgan Chase, Plano, TX
Software Developer

2021 – Present

Technical Scope: Java, Spring Boot, GAIA, PCF, JDBC, RESTful Web-Services, JSON, JIRA

Design and develop resilient micro-services which used by multiple internal clients like Chase.com, Chase investments etc.

- Successfully migrated on-prem GAIA based application to AWS with full end to end implementation
- Created composite spinnaker pipeline for our team which provides blue green deployments and immediate rollback.
- I manage applications which caters data to login page for investment platforms. I made lot of enhancements to improve performance as well as reduce downtime functionally and infrastructure wise.
- Designed and developed Market-data API which supports real time prices for equities and ETF's
- Designed and implemented how to reduce the downtime when database call fails using Resilience4J.
- Worked on end-to-end migration from legacy down streams to RESTFUL down streams.

Vitech Systems Group, Iselin, NJ
Software Developer

2018 – 2021

Technical Scope: Java, Spring, Hibernate, JDBC, SQL, Postgres, SVN, JIRA, Oracle

Worked on customizing V3 Core product for multiple insurance and health care clients in accordance with requirements.

- Collaborated with fast-paced DEMO team within the company for advertising V3 application to new clients.
- Developed and implemented complex claim rules for validating a reported claim.
- Optimized and simplified the processes by analyzing business requirements and rebuilding existing solutions.

Vanderbilt University Medical Center, Nashville, TN
Application Developer

2018

Technical Scope: Java, Spring, Hibernate, AWS

Worked on Java application which focuses on the tissue procurement for research purposes.

- Developed an application for investigators to register online and request human tissues and research projects.
- Established an additional feature for the CHTN application for sending text notifications to customers from the medical center by using AWS SNS.

Additional Experience

Teaching Assistant – University of Louisiana at Lafayette (2016 – 2017)

Key Application Development Projects

Similarity measure using Sketching Algorithms

- Implemented similarity measures, such as Adamic-Adar, Common Neighbors, Preferential Attachment, and Jaccard Coefficient using Sketching algorithms and minimized application result time by 33 % using graph sketches.

Visualization of Fitbit Data Project:

- Pinpointed various user locations by using Google Maps API that introduced a Fitbit API equipped application and visualized data by using Google charts and JavaScript.

Education

Master of Science in Computer Science – University of Louisiana, Lafayette, 2017 | GPA: 3.66

Bachelor of Technology in Computer Science – Jawaharlal Nehru Technological University, 2015 | GPA: 3.5

Certifications

- AWS Certified Developer Associate – 2022
